Key Responsibilities:

- Build new features, product with VB.Net, AngularJS / Web API / AJAX
- Analyze, design, implement and integrate functional requirements for the system.
- Deliver product features following the agile product development methodologies.
- Deliver quality code along with writing unit test cases.

Description: At Advanced Software I was working on a ticketing product which exists in UK market for almost past 3 decades. Over here I have to work on SAAS platform based on VB.Net/C# .Net/ API/ ASP.Net/ Service and SQL server with some backend technologies like iSeries. Creating XUnit, Cypress etc. while in-sprint development.

Cybage Software Pvt. Ltd. (Sr. Software Engineer)

Duration: Oct 2016 to Dec 2018

Key Responsibilities:

- Build new features, product with C#, AngularJS / Web API.
- Analyze, design, implement and integrate functional requirements for the system.
- Deliver product features following the agile product development methodologies.
- Deliver quality code along with writing unit test cases.

Description: I have worked with Cybage on some large-scale cloud integration product. This has been developed using some of the latest technologies from .net stack along with Windows Services, AngularJS and WebAPI.

Cognizant technology solutions India Ltd. (Associate – Projects)

Duration: Aug 2014 to Oct 2016

Key Responsibilities:

- Build new features, product with MVC.Net / BackboneJS / web API / OData.
- Analyze, design, implement and integrate functional requirements for the system.
- Deliver product features following the agile product development methodologies.
- Deliver quality code along with writing unit test cases.

Description: I had worked with Cognizant for more than 2 years on a product for one of the big four audit firms. My daily work here was to complete tasks defined for assigned stories, following the agile methodologies. New technical skills I have achieved here are Web APIs, OData and BackboneJS.

I am working here on some the latest technologies like oData and BackboneJS. We used to work on a customized and optimized framework built using marionette and BackboneJS. At server side we used web APIs built using WCF and MVC framework. We used oData and entity framework to handle data of the project.

Things I have done here:

- I have worked for the various system modules like SCOTs, Audit Plan, ReviewNotes Hub, Copy Hub etc.
- To improve performance of the APIs by modifying queries and optimizing the logic.
- Solve the in-sprint regression defects.
- Writing quality code with unit test cases.
- Created automation tool of generating code coverage report under the Cognizant Innovation program.
- Attending and providing technical session at account level or team level.

Zealousweb Technologies Pvt. Ltd. (.Net Developer)

Duration: May 2013 to June 2014

Key Responsibilities:

- Build new systems with .NET 3.5 / ASP.NET / C# / MVC / MSSQL Server / jQuery / Web Services.
- Analyze, design, implement and integrate functional requirements in the solutions.
- Address technical aspects with team lead and functional aspects with project manager.
- Lead/mentor developers and share knowledge through knowledge-sharing presentations.
- Participate in a small, experienced, energetic team on a rapid, agile development schedule.

Description: I had worked here in .Net department on different .Net framework and MSSQL versions. I was in a lead role for development in the following projects WorldClassGolfTours, Yearbook, AussieCampervans, Earth API and new CMS development. I was also part of the team developing in projects like QRdip, VillasItaly, HTML 5 projects etc.

Things I have done here:

- 1) **World Class Golf Tours** - This is an online golf course booking system, which provides booking of golf course from all over the world to customers. This website includes third party API like google map, pay pal etc. and developed under .Net framework 3.5 and SQL Server 2008 R2.
- 2) **Chicago Booth Yearbook Facebook Application** - This is student yearbook type Facebook app on which user can join and reconnect their class mates and other student of Chicago Booth through this app. User can import photos from Facebook, user can tag, comment and report photos and notes. This application developed under .Net MVC 4 platform and SQL Server 2012.

iPatientCare Pvt. Ltd. (Software Engineer)

Duration: June 2011 to April 2013

Key responsibilities:

- Requirement catalogue understanding. Performing impact analysis.
- To develop the application on the basis of impact analysis.
- Create and execute UFTC/UTC for given change/Enhancement/Functionality.
- Solving the defects logged on daily basis by QA. Releasing the patches if require.

Description: I had worked here on healthcare domain on a product named "iPatientCare", which is complete web based EHR product following SAAS model and developed under .net platform.

My role includes enhancement, changes and maintenance, and optimizes iPatientCare Application. Reports, Chart, Dashboard and services were my major modules during those two years. I have gain knowledge and methodology to work in an ISO certified company here.

And on technical aspect I have learned and worked on ASP.Net, SQL Server 2008 R2, SSRS, JavaScript, IIS and third-party controls like Infragistics. I have also an intermediate knowledge about SSIS. On .Net platform I had worked here on 2.0 and 3.5 framework features. On database side I had worked on lots of features and functionalities supported by SQL Server 2008 R2 like stored procedures, functions, views, triggers, profiler, jobs, transactions etc.

Things I have done here:

- Development of new module MU (Meaningful use) in iPatientCare Web Application by using JavaScript, .Net 3.5 and SQL Server 2008.
- Created Reports such as encounter sheet, patient info, provider performance report etc in EHR Application Using SSRS Reporting tool and SQL Server 2008.

- Developed windows services of MU which call a web Service for Inbound/Outbound files process to U.S. healthcare Registry and Fax for getting Interoperability as Per HL7 Standard between Provider of US healthcare. I have used window Service project and SQL Server 2008 R2 to achieve above functionality.
- Query performance tuning and report optimization in EBA product using SQL Server 2008 R2 and SSRS.
- Worked on web application compatibility for different versions of IE using JavaScript, Ajax and CSS.
